---

## EXPERIENCE

### ExamSoft Worldwide, Inc – Farmer's Branch, TX

*ExamSoft provides scalable assessment solutions predominantly for graduate programs. The software enables faculty to deliver secure exams using institution or student owned computer devices. The analytics allow education programs to improve their assessment design, drive curriculum design, and comply with accreditation.*

#### Front End Software Engineer

Sep 2019 – Present

Maintain exam delivery and data analytics software built in AngularJS. Build new features according to U/X Design team standards and Product Owner acceptance criteria. Communicate with backend Java Developers on REST API needs. Collaborate with DevOps to fix deployment pipelines. Provide updates on progress and roadblocks in daily standups.

#### *Key Accomplishments:*

- Closed 100% of assigned tickets within first year of employment without prior knowledge of AngularJS
- Volunteered for an in-house hackathon where 4 employees stayed after hours to complete a POC for a new feature needed by customers
- Resolved application-wide Cross-Site-Scripting issues that was critical to the company's security compliance initiatives

#### Client Success Manager

May 2018 – Aug 2019

#### Implementation Consultant

Oct 2015 – Apr 2018

#### Training Specialist

Jun 2013 – Oct 2015

Reduce churn by monitoring at risk clients and attending to their needs. Serve as voice of customer base to the Product team. Report software bugs using JIRA for future releases and communicating fixes to clients after each Agile sprint.

#### *Key Accomplishments:*

- Awarded "There is No I in Team" for readiness to assist team members reach their goals
- Initiated customer journey maps to help the organization better understand how customers use products
- Exceeded 2018 revenue expansion targets by 40%
